1051U COMBINATION LOCK

FLEXIBLE CLOSURE SYSTEM, IDEAL FOR OFFICE FURNITURE.

COMBINATION LOCK

1051U COMBINATION LOCK

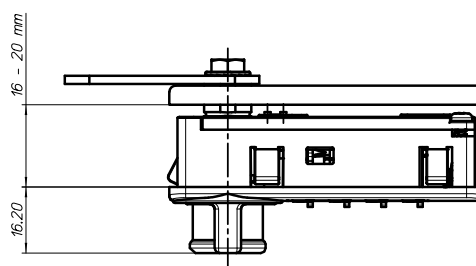

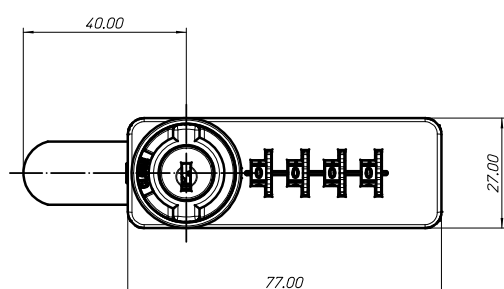

The combination locks of 10U Series are flexible closure systems suitable for any type of material (wood, glass, and metal), easy to install (thanks to the quick fixing system), and immediately and intuitively usable, with four numbers and front cover. Model 1051U is the ideal solution for lockers in gyms and spas changing rooms, for cabinets in public institutions, public areas, schools, and hospitals: in brief, in all the environments where a combination lock represents an added value in terms of service, and since it makes keys and padlocks unnecessary.

MAIN FEATURES

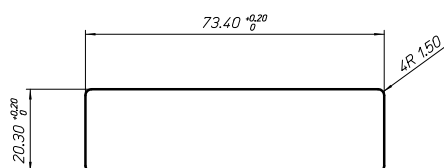

- Horizontal lock with cam
- Combination wheels with 4 digits
- Universal application (wood, metal, or glass) up to 20 mm thick
- Polymer body and front cover
- Available in black and silver finishes
- Ergonomic rotating knob
- Emergency key for code recovery
- Three indicators: open (green)/close (red)/change code (blue)

1033U COMBINATION LOCK

FLEXIBLE LOCKING SYSTEM, IDEAL FOR OFFICE DRAWERS

COMBINATION LOCK

1033U COMBINATION LOCK

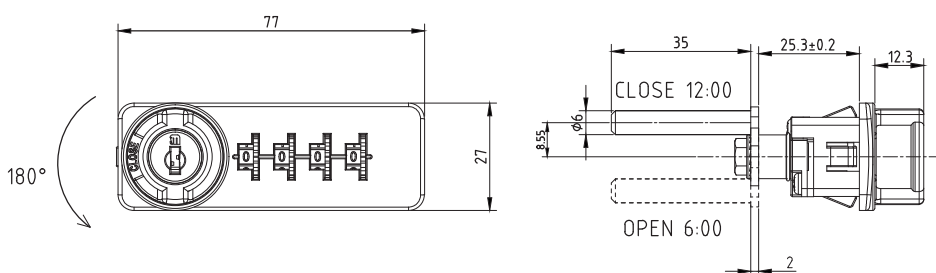

Combilocks is a line of combination locks (Series 10) which are flexible locking systems, suitable for any type of material (wood, glass, and metal), easy to install (thanks to the quick-fix system) and ready for immediate use (with four numbers and a front cover). The 1033U model is the ideal solution for office drawers and in all environments where offering a combination lock represents an added value in terms of service for a wide range of users and ease of use, as keys and padlocks become unnecessary

MAIN FEATURES

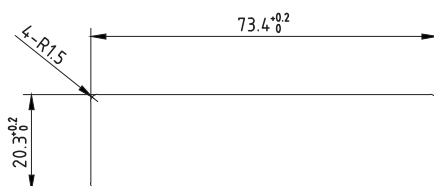

- Horizontal lock for drawers
- 4-digit combination wheels
- Universal application (wood, metal, or glass) up to 20 mm thick
- Polymer body and front cover
- Available in black and silver finishes
- Ergonomic rotating knob
- Emergency key for code recovery
- Three indicators: open (green) / closed (red) / change code (blue)
